Dear Hal, 1/9/98

This will have to be brief because this is not one of my better days.

From Temples expressed political beliefs I do not think you'll get far.

However, he regards Oswald as the pidgeon. What woould he think it he could believe the fact, that Oswald fired no shots?

Dpending on the offense whether ONI would investigate. Defection is such an offense and they did not speak to all who worked with Oswald. as we know!

On classification, the whole outfit had some degree of classification but five had the crypto clearance. Of them Oswald was one. At the time another one of those five, Scharand, killed himself he was guarding their crypto van at Cubi point. Had to have crypto clearance just to go in it.

My official source on the clearance is the court martial inquest into the Scharand suicide.

Some of Oswald's milltary records are in the 26.

Have you considered getting a stapler that works? You need one!

Thanks andbest,

Hal
